Script-Controlled ACL: Restrict Record Access Based on Field Value

Ideation Phase: Define the Problem Statements

Date: October 3, 2026	**Maximum Marks:** 4 Marks
Team ID: SWTID-2026-8089	**Project Name:** Script-Controlled ACL

Customer Problem Statement Template

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you will also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe the customer and their attributes here
I'm trying to	List the thing they are trying to achieve here
but	Describe the problems or barriers that get in the way here
because	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions that result from the problems or barriers

Example:

Problem Statement Table

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A ServiceNow administrator responsible for protecting student records	Make sure users can see and change only the records that match their branch (for example, EEE)	Any user with basic access to the table can view, edit, create or delete sensitive student records	The table has no record-level rules that check a user's role together with the Branch field value	Worried and concerned about data exposure, unauthorized changes and loss of control over student data
PS-2	A faculty or branch user (EEE) who works with student records	View, create, edit and delete only my own branch records according to the permissions I have been given	I either see every record or none at all, and cannot tell which actions I am allowed to perform	Read, create, write and delete ACLs are not separated by role (bb1 to bb4) and no script checks role and field value	Confused and restricted in my daily work, and frustrated by inconsistent access
